

Vacker Sign's

P&T TUFF

ARK RAIL

Sign Panel

- Economical
- Excellent graphic quality
- Laminate protects underlying graphics against:
 - UV Damage - *Proven to protect graphics from weathering and UV exposure in Arizona for at least 5 years*
 - Spray paint / permanent marker
 - Abrasion and scratches
 - Chemicals
- Easy to read matte surface prevents glare
- In-house fabrication - quick turn-around

Vacker's **P&T TUFF** sign panel can be an excellent choice for *interpretive*, *regulatory*, *directional* and *map* panels, particularly when cost is an issue. While *high pressure laminate* panels have their place, "P&T" Tuff panels offer impressive durability at a **fraction of the price**. Why pay for 10 year durability if your message or information will change before then? No panel is "vandal proof" - if panel replacement is inevitable, why pay more?
